Expense Management Dashboad

This web/mobile dashboard streamlines the management of hotel, travel, and DA expenses through a three-step approval process involving Employees, Heads of Departments (HODs), HR, and Management (admin). Employees submit their expenses through the dashboard, initiating the process. In the first step, the HOD reviews the submitted expense. If the expense is within the set limits, the HOD approves it. If the expense exceeds the limits, the HOD requests further explanation from the employee. Upon satisfactory clarification, the HOD can then approve the expense. In the second step, HR conducts the final approval for payment. This structured workflow ensures thorough vetting of expenses, making the process efficient and transparent, thereby easing the administrative burden on HR and management while ensuring compliance with the company's expense policies.
